Pacific Gas and Electric Company (PG&E) and the Association of Monterey Bay Area Governments (AMBAG) have joined forces to improve energy efficiency in our tri-county area hospitality industry. By installing a variety of available energy saving equipment you will help to reduce greenhouse gas emissions while saving money at the same time. AMBAG has served over 300 hotels and motels in the region during our past 2006-2009 program cycle and has helped the local hospitality industry save more than 20,000,000 kWh of energy annually. We would like to include your hotel/motel in our latest Hospitality Program cycle beginning in 2010, which includes a number of new available measures.

Measures currently offered include:

- PTAC heating/air-conditioning control systems
- Energy efficient lighting (including dimmable lighting options)
- LED exit signs
- Refrigerator gaskets and seals
- Vending machine controllers
- Occupancy sensors for lighting

Upon enrolling in the program, our energy specialist will schedule an appointment to visit to your hotel/motel, discuss your current equipment and operations with you and develop a proposal showing suggested efficiency measures, available rebates and co-payment levels. If you choose to proceed with installation, our program provides a streamlined process of equipment purchase, installation, inspection and rebate processing to provide quick, easy, quality-guaranteed product installation.

For more information or to enroll in the program, please contact Emily Schell at 831-264-5089 or eschell@ambag.org.

**Improving your energy efficiency can lead to a more
efficient operation and a healthier bottom line.**

California consumers are not obligated to purchase any full fee service or other service not funded by this program.

This program is funded by California utility customers and administered by Pacific Gas and Electric Company, under the auspices of the California Public Utilities Commission.

“PG&E” refers to Pacific Gas and Electric Company, a subsidiary of PG&E Corporation.
