## FREE COMPUTER ENERGY SAVING PROGRAM FOR TRI-COUNTY SCHOOL DISTRICTS

### SAVE ENERGY & HELP THE ENVIRONMENT AT NO COST TO THE SCHOOL DISTRICT

PowerSave software offers ongoing energy savings through better management of the power settings on both desktop PCs and MACs. PowerSave allows organizations to set standards that ensure idle computers are either using low power or completely shut down. PowerSave provides centralized control over the power management features of each PC or MAC within a computer network.

### Energy & Money Savings

On average, PowerSave reduces energy usage by 200 kWh annually per desktop computer, and does so in an unobtrusive manner that does not affect user or computer performance. Each year, an average participating school could expect to save about \$24,000 in energy costs and reduce approximately 317,000 lbs of CO<sup>2</sup> Emissions for every 1000 desktop computers upgraded with the software. The AMBAG Energy Watch partnership with KJK&A, Inc. allows us to finance the onsite deployment, licenses, and five years of maintenance for every PowerSave computer at NO cost to the school district.

### The Next Step

Contact Charlie Buck at 831-264-5095 or [cbuck@ambag.org](mailto:cbuck@ambag.org), or visit <http://faronicsusa.com> to deploy the software & help your school district save money today!
